FRANKFURT INTERNATIONAL INDEXING CONFERENCE

The Conference

Will be held at the Fair Exhibition site, Rooms: "EFFEKT" Hall 3.C, East & "FACETTE" Hall 3.Via, West. Attendants have to buy a 1-day ticket to the Fair for Professional visitors .

Registration

You don't need to register for the conference, or pay a conference fee. However, the conference rooms have limited capacity, therefore if you intend to come we would like to hear from you. Please mail us at : indexingconference@gmail.com.

Accommodation

Hotel room prices are exorbitantly high during the Book Fair period; however, it is possible to book accommodation at private homes for €60/65 per night. Breakfast not included. You have to fill in this form: www.frankfurt-tourismus.de/en/Accommodation/Private-Accommodation.

Public Transport

Public transport in Frankfurt is free on presentation of your Book Fair ticket, only on the day your ticket is valid.

Further information

On the Book Fair website, you can find all the information you need if you want to come: http://buchmesse.de/en/fbf/visit/for_professional_visitors/. Or you can email the organizers at: indexingconference@gmail.com.

Max McMaster is a freelance Australian indexer working across all fields, but with a preference for the sciences. His presentation is titled: **Indexing in the Editorial Process**.

Hendrik Case is a software developer in the field of publishing and typesetting services at abavo company. He will talk about technological developments in indexing.

Pilar Wyman is a freelance indexer from the U.S., who's also a member of the ASI Digital Task Force.

Pierke Bosschieter is a freelance Dutch indexer of academic books. Their joint presentation will be about the added value of linked indexes and notes in e-books.

David Ream is chief consultant of Leverage Technologies. He will talk about software that allows indexers to work in their dedicated indexing software to create entries while embedding identifiers in the book's documents.

Frances Lennie is the driving force behind CINDEX™, a dedicated indexing software program. The title of her talk is: **Why Indexes Persist and Indexers Persevere**.

After every presentation there will be time for questions, information exchange and professional dialogue.
